

Polleninformation Lower Austria

Released by

SciCon Pharma Science-Consulting GmbH

Thaliastrasse 83 Top 9, 1160 Wien

in cooperation with Zentralanstalt für Meteorologie und Geodynamik Wien

on behalf of the Niederösterreichische Landesregierung,

Gruppe Gesundheit und Soziales - Abteilung Umwelthygiene

Released on 2nd of February 2012

New pollen season has arrived, cold weather prevents flowering

Extremely cold weather prevents alder and hazel from flowering. Nevertheless alder and hazel are ready to flower in the lowlands. Temperatures above 5°C, dry and sunny conditions are necessary to evoke symptoms there.

In higher elevations, the risk is minimal at the time.

Forecasted start of season :

Waldviertel (Raum Allentsteig/Zwettl): 2.2. - 13.2.

Weinviertel (Raum Poysdorf/Zwerndorf): 22.1.- 25.1.

Wiener Becken (Wr. Neustadt): ready for pollen release

Donauraum (Raum Krems): ready for pollen release

Mostviertel (Raum Amstetten): 22.1. - 24.1.

Voralpen (Raum Lunz/Lilienfeld): 3.2. - 17.2.

St. Pölten: ready for pollen release

Patient's hayfever diary

Journalize your personal hayfever diary about your allergic complaints and compare with the concentrations of pollen in the air. You will learn more about the preventive measures you have taken and their effort.
