Pollen information for Tyrol

We are back with forecasts (countdown) for the coming season since mid December.

New: patient's hayfever diary

Journalize your personal hayfever diary about your allergic complaints and compare with the concentrations of pollen in the air. You will learn more about the preventive measures you have taken and their effort.

You can enroll anonymous or with your name at <http://phd.polleninfo.org>

please refer to the German pages - there is no English text available. Use the flag symbols on top right of this page for language switch.

However, Countdown and FlowCharts can be viewed also from this page.
